

# Song Builder Workshops

## Summary:

Beginner Workshops give students the opportunity to work with their peers and the instructors to create, record, and perform a song from scratch. With the instructor's guidance, students will use their creative minds and musical ability to craft a song to perform and record. The instructors will use software to design a song structure with various samples and loops, with the students adding their own touch to the masterpiece.

Students do not need a musical background- they just need a love of music!

Students will sing in a group or solo, play percussion instruments like shakers, tambourine, or bongos, and if they do play an instrument we will work it into the song.

During the Quarterly LIVE Performance Session, they will be able to perform it LIVE for their family and friends, and they will receive a CD & Video of the song, as well as a Workshop Completion Certificate & Class Photo to take home and remember the fun they had with their new friends.

## Age Groups:

Children: 7-10

Juniors: 11-14

Seniors: 15-18

Adults: 19- ?
